SUMMARY

Growth-focused Full Stack Developer combining product engineering, marketing technology, and community growth. Built multi-tenant SaaS applications, conversion-focused web experiences, paid landing-page experiments, SEO content systems, cross-domain analytics, and Discord automation. Experienced with production-ready architecture and third-party integrations, including OpenAI, QuickBooks, and Shopify.

CORE SKILLS

Programming: Java, JavaScript, TypeScript, PHP, Python, C#, HTML5, CSS3, SQL

Frontend: Next.js, React, React Router, Tailwind CSS, Bootstrap, JavaFX

Backend: Spring Boot, Laravel, Node.js, Express.js

Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Firebase

APIs & Auth: REST APIs, OAuth 2.0, JWT, session-based authentication, third-party API integration

Marketing & Growth: GTM, GA4, SEO, A/B testing, conversion tracking, campaign attribution, Discord community automation

Cloud / DevOps / Architecture: Docker, Ubuntu/Linux, multi-tenant architecture, caching, queue-based processing

AI & Developer Tools: OpenAI API, Codex, Cursor, Claude Code, GitHub Copilot, AI-assisted planning, debugging, refactoring

Languages: English (Fluent), French (Advanced), Mandarin (Native)

PROFESSIONAL EXPERIENCE

BVIO Technology - Full Stack Developer

Jun 2026 - Present

- Developed and launched Violoop's product website and Shopify reservation journey with React, TypeScript, and Vite, translating campaign messaging into responsive product storytelling and a conversion-focused checkout path.
- Implemented marketing measurement across the Violoop site and Shopify checkout, including consent-gated OpenAI Ads, GTM/GA4 events, cross-domain campaign attribution, click-ID persistence, and conversion tracking.
- Built and deployed paid landing-page experiments with audience-specific messaging, experiment-aware analytics, and branch-based Cloudflare routing, enabling cleaner campaign comparison and conversion optimization.
- Architected a headless Shopify Blog and SEO content engine with editorial controls, prerendered article pages, structured metadata, tag archives, sitemap/RSS generation, and automated Cloudflare publishing refreshes.
- Built and grew the Violoop Discord community and developed automated bots for onboarding, moderation, role assignment, campaign announcements, and recurring community engagement workflows.

Tech Stack: React, TypeScript, Vite, Cloudflare Pages/Workers/KV, Shopify, GTM/GA4, OpenAI Ads, SEO, A/B Testing, Playwright, Discord Bots, Git/GitHub

PCS Inc. - Full Stack Developer

Nov 2025 - Present

- Designed and built the company website and a client-facing, multi-tenant SaaS financial advisory web application from scratch, covering architecture, database schema, API design, frontend implementation, mobile compatibility, role-based access, authentication, and admin tools.
- Built and deployed 10+ application endpoints and integrated OpenAI API and QuickBooks API, using OAuth 2.0 and Ngrok tunneling during development and external-service testing.
- Integrated AI into both the product and the development workflow; reduced redundant external API usage and improved processing speed through caching, queue-based processing, and controlled refresh strategies to handle rate limits.
- Designed the end-to-end technical workflow with CTO approval, collaborated with product and UX stakeholders, and supported rollout for approximately 15 users while the platform moves toward production and iterates on client feedback.

Tech Stack: Next.js (App Router), TypeScript, PostgreSQL, OpenAI API, QuickBooks API, OAuth 2.0, REST APIs, Docker, Git, Ubuntu

EDUCATION

John Abbott College - Attestation of Collegial Studies (AEC) -

Jan 2026

Full Stack Developer

McGill University - Honours Mathematics and Computer

Science Program (previously attended)

CERTIFICATIONS & AWARDS

- AWS Certified Security - Specialty
- Technical Training Certificate - Front End Web Developer, John Abbott College (Jan 2026)
- Technical Training Certificate - Software Development, John Abbott College (Jan 2026)
- Awards: 2025 Spring & Summer Dean's List; Euclid Distinction; Pascal Distinction; Fermat Distinction; Cayley Distinction; CSMC Distinction
